DHIRAJ KUMAR

Software Engineer | C# • .NET • REST APIs • SQL Server • React • AI • Python

dhiraj7kr@gmail.com | +91-9472826071 | Hyderabad (open to relocate) | LinkedIn | GitHub | Website

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience designing, developing and deploying web-based enterprise applications in C# and .NET with REST API integration and SQL Server, for global clients including the financial services firm Bajaj Finance. Strong in object-oriented programming, data synchronisation, and workflow automation, with a track record of working independently, supporting live business operations, and analysing and fixing problems. Keen to apply my .NET skills to industrial software and MES solutions.

TECHNICAL SKILLS

Backend & Web: C#, .NET, REST API development and integration, web application development, Node.js, Express.js, Spring Boot, Python, Java 17+

Frontend: JavaScript, React.js, HTML, CSS, SharePoint (SPFx), React Native

Database: SQL Server (queries and data handling), MongoDB, data synchronisation and reconciliation

Tools & Practices: Git, GitHub, Azure DevOps, Microsoft Azure, object-oriented programming, software design, debugging, troubleshooting, Power Automate

PROFESSIONAL EXPERIENCE

ACUVATE Software Pvt. Ltd. | Software Engineer *August 2024 – Present*

HMA – Bajaj Finance (Full-Stack Flight Portal, Financial Services)

- Delivered full-stack features using a **React frontend, .NET backend and SharePoint (SPFx)** integrations for operational tracking used by business stakeholders.
- Developed a **.NET / C# console application** to synchronise employee booking statuses with the HMA team, keeping data consistent across systems.

Holland America Line – "ANNA" AI Travel Assistant

- Led development of ANNA, an AI-powered assistant for premium cruise services, from design through deployment.
- Engineered a high-performance **live-agent connector in .NET / C#** enabling real-time handoffs between the AI bot and human support agents.

Carnival Corporation – Workflow Automation & Azure AI

- Designed and deployed **Power Automate workflows** and Copilot Studio bots, integrating **Azure AI services** for a global enterprise client.
- Built **Python data pipelines** to optimise Excel and SharePoint data infrastructure, reducing manual effort.

Blakes – SharePoint to SQL Migration (Legal Services)

- Helped migrate the complex database architecture of Blakes, a leading Canadian law firm with offices across Canada, New York and London, from **SharePoint to SQL**, ensuring robust performance and security.

PROJECTS

- **Duper AIO (GitHub)** – Personal productivity, finance and security app built with React Native, Expo, Node.js and MongoDB; includes secure local storage for password-protected notes and audio files.
- **Create Document Report [AI-Enhanced Edition]** – Python-based automated research pipeline that collects data from Wikipedia, RSS news feeds and deep web crawling, extracts articles, downloads relevant images and builds a structured knowledge base for any topic, producing a professional PDF report (executive summary, image gallery, timeline, key facts, references) and a raw JSON payload.
- Added a zero-cost local AI synthesis stage: the JSON payload is passed to a locally hosted **Ollama** instance running **qwen2.5-coder:7b**, which deduplicates overlapping facts, cleans scraped formatting and generates a polished Markdown dossier – with no paid API keys and no research data sent to the cloud.

EDUCATION

Jain Deemed-to-be University, Bengaluru | B.Tech, Computer Science & Engineering *2020 – 2024*

CGPA: 8.2 / 10

CERTIFICATIONS

- AI and Machine Learning – Udemy
- Oracle Fusion Cloud Applications HCM Foundations Associate (72%)
- C# Fundamentals – Udemy | Java 8+ Essential Training – LinkedIn Learning
